Mechanic—2013

## Skills

- › Programming languages:  
C++, Python, and Java
- › Experience as automotive  
and aircraft mechanic
- › Familiar with Office  
and Adobe Suites
- › Fluent in Spanish

## Summary

I am a creative problem solver with practical knowledge of graphic design, computer programming, visual arts and audio production. In work and life, I concentrate on pragmatism and empathy. My personal website, linked beside, is the place to find a portfolio.

## Experience

### DESIGN & PROGRAMMING PROJECTS

#### SHINTARO AKATSU SCHOOL OF DESIGN—2018

Completed various projects with feedback from peers and instructors using digital and traditional art media. Work included posters, ads, brochures, menus, magazine spreads, and varying video projects. Print portfolio available.

#### RANDOM QUOTE MACHINE, FREECODECAMP—2016

A random chapter selector from the Tao Te Ching, something I'm proud to share and incorporate in my life. My aim was an airy aesthetic to complement the Taoist philosophy of flow. Tools: BassCSS, JQuery, CoffeeScript, Twitter and Facebook APIs.

### EMPLOYMENT

#### BUSSER, BASS PRO SHOPS, BRIDGEPORT, CT—2015–2017

Assisted the restaurant operations in any way possible: including solving bowling lane mechanical issues, and, excluding handling of money and food preparation.

#### RETAIL ASSOCIATE, AUTOZONE, DERBY, CT—2013–2014

Helped customers find the right parts, tools, and solutions to their projects; maintained the store in good working order and in a cleanly appearance.

#### CONTRACTED ASSISTANT, DIVINE REALTY, SEYMOUR, CT—2010–2012

Managed a collection of realty listings on various websites and assisted with general office tasks. Some landscaping and renovation work was done as well.
